FEDERAL DATA REPORTING

UCR VERSUS NIBRS

Benefits of switching from the Uniform Crime Reporting (UCR) Summary Reporting System (SRS) to the National Incident Based Reporting System (NIBRS):

Implemented to improve the overall quality of crime data collected by law enforcement, NIBRS captures details on each single crime incident—as well as on separate offenses within the same incident—including information on victims, known offenders, relationships between victims and offenders, arrestees, and property involved in crimes.

Unlike data reported through the UCR Program's traditional Summary Reporting System (SRS)—an aggregate monthly tally of crimes—NIBRS goes much deeper because of its ability to provide circumstances and context for crimes like location, time of day, and whether the incident was cleared.

When used to its full potential, NIBRS identifies, with precision, when and where crime takes place, what form it takes, and the characteristics of its victims and perpetrators. Armed with such information, law enforcement can better define the resources it needs to fight crime, as well as use those resources in the most efficient and effective manner.

NIBRS:

- Provides greater specificity in reporting offenses. Not only does NIBRS look at all of the offenses within an incident, but it also looks at many more offenses than the traditional SRS does. NIBRS collects data for 52 offenses, plus 10 additional offenses for which only arrests are reported. SRS counts limited data for 10 offenses and 20 additional crimes for which only arrests are reported.
 - Collects more detailed information, including incident date and time, whether reported offenses were attempted or completed, expanded victim types, relationships of victims to offenders and offenses, demographic details, location data, property descriptions, drug types and quantities, the offender's suspected use of drugs or alcohol, the involvement of gang activity, and whether a computer was used in the commission of the crime.
 - Helps give context to specific crime problems such as drug/narcotics and sex offenses, as well as issues like animal cruelty, identity theft, and computer hacking.
 - Provides greater analytic flexibility. Through NIBRS, data users can see many more facets of crime, as well as relationships and connections among these facets, than SRS provides.
-

NATIONAL INCIDENT BASED REPORTING SYSTEM (NIBRS)

Starting in 2020 the Addison Police Department began reporting our crime statistics to the State of Texas and to the FBI using the NIBRS format. NIBRS offenses are split into two categories: Group A and Group B.

Group A contains all 7 of the classic UCR Part 1 offenses and an additional 45. These 52 offenses are sorted into three categories: crimes against persons, crimes against property, and crimes against society.

Group B contains mostly arrestable offenses including criminal trespass, alcohol offenses, and disorderly conduct. Offenses that do not fall in any other category are also included in Group B.

The following pages will break out each of the three Group A categories and Group B, providing exactly what offenses are included, how many of each were reported, and how many were cleared by investigators.

UCR Part 1 Offenses 7 crimes

NIBRS Group A Offenses 52 crimes

UNIFORM CRIME REPORTING (UCR)

Long Term Trends

The Uniform Crime Reporting (UCR) program was started by the FBI to develop a system of consistent police crime statistics across the nation based on population. Part 1 Offenses are the following 7 offenses: murder, rape, robbery, aggravated assault, burglary, larceny-theft, and theft of motor vehicles.

UCR statistics can give a brief comparison of major crime across the country over time. However many categories of crime were excluded from UCR such as financial crime, cyber crime, and crimes relating to public safety. Any lesser crimes or arrests from the same incident were also not counted.

2019 was the last year Addison submitted UCR data to the FBI. Comparative statistics for other cities and states will now be formatted as NIBRS data.

The graph below shows the total number of Addison UCR Part 1 or NIBRS Group A offenses over a 5 year period.

Total Number of Offenses:

TOTAL		483	452	93.6%

The total number of offenses in each NIBRS code name are represented in the pie charts below. Due to the small number of offenses examined in the Group B category they are not grouped and there is only one pie chart. The NIBRS code names with the largest reported incidents are drunkness (public intoxication), driving under the influence (DWI), and trespass of real property (criminal trespass).

COVID-19

Departmental Impact

The impacts of the COVID-19 have been felt across the nation since March of 2020. APD has adapted to the unique challenges and difficulties of operating with members of the public during this highly infectious pandemic. Immediate changes to operations were made and safety remains the highest concern for our employees and citizens.

Unemployment spiked which historically has heavily affected crime rates

Restrictions on any optional traffic stops, suspicious activity markouts, and public contact activity

Jails intermittently unable to accept any arrested persons due to COVID outbreaks

Courts halted proceedings and transitioned to online hearings

Enforcement changes highly favor writing at-large warrants for nonviolent misdemeanors

All Town-sponsored events were cancelled, ACAP program suspended, and other community outreach programs halted

Phone-only reports for delayed offenses without physical evidence

Lack of confirmation on arrest warrants across the state leaving officers unable to arrest wanted persons

Restaurants, bars, and other businesses operated at reduced or no occupancy

Below this text is a paragraph about the department's commitment to ethical standards and a print icon.

Join Our Team

Addison is a little town that lives large. Even though it is only 4.4 square miles with a population just under 16,000, Addison is home to 180 restaurants, 24 hotels, and 10 million square feet of office space. During the day our population swells to 125,000, and during the evening we are an entertainment hub for North Texas.

Addison's Police Department offers career opportunities for people who appreciate the advantages of working in a small town but enjoy the flexible job options available in a larger town.

Preserving order and protecting the lives and property of our citizens, the Addison Police Department adheres to the highest ethical standards in service to our community. As the city's peacekeeping partner, we enforce laws and ordinances, safeguard individual liberties, and take measures to build public trust and security. Treating everyone with fairness, dignity, and respect, the department pledges to manage our organization with professionalism, leadership, and integrity.

LICENSE PLATE RECOGNITION

Phase One (2018-2020)

Summary of Project:

The Town successfully installed 8 LPR cameras in the Les Lacs, Winnwood, and Oaks North neighborhoods. Investigators have access to scans from our cameras, over 550 other police agencies' cameras, and every commercial vehicle contributing their scans.

So far LPR has been critical in the investigation of 39 misdemeanor and felony cases. At least two stolen vehicles a month are recovered by patrol officers thanks to these alerts. Many high-profile cases can be solved partially or in whole due to LPR data.

One program offered by LPR, the Target Alert System (TAS), alerts every patrol officer of vehicles scanned in town tagged as missing persons, stolen vehicles, or felony warrants. This provides real-time location information for wanted persons and vehicles.

Investigators use current and historic LPR scans to identify suspect vehicles, correct addresses for wanted persons, and workplaces or temporary housing for suspects.

The Addison Police Department follows Town guidelines regarding use of data and restrictions on access. Audits are conducted by both internal staff and contracted experts. Please see the License Plate Addendum for a complete report of use.

Town Policy:

License Plate Recognition systems will be used by the police department for legitimate law enforcement purposes only investigating circumstances in which law enforcement officers reasonably believe that the plate data are relevant to an ongoing criminal investigation.

Unless plate data has been flagged, retention periods should be measured in days and weeks, not months and years. The Town will not store data about innocent people for more than 45 days and will only keep flagged data when it is necessary for legitimate law enforcement investigative purposes.

Citizens will be able to find out if plate data of vehicles registered to them are contained in the data base used by the police department.

The Town will not share plate data with non-law enforcement, third-parties. The Town will comply with the Texas DPS License Plate Depository Recognition Program and abide by their rules.

The police department will report data usage publicly and on an annual basis. The Town will not collect personally identifiable information.
